Let's Talk Trash & Recycling

On July 1, 2017, the City of Los Angeles launched recycLA, a citywide, waste franchise agreement for businesses and multi-family buildings. **Please help our building successfully participate in the new recycling program.**

WHY RECYCLA? The purpose of the new program is to extend recycling opportunities to everyone in the City, ensure predictable and protected rates, reduce trash truck congestion and wear-and-tear on city streets, and provide much needed infrastructure and equipment improvements. For more information on recycLA, please visit www.recycLA.com.

RECYCLING TIPS:

Empty containers before recycling: Although recyclables do not have to be 100% clean, we ask that you empty them of all liquids and significant food discards before disposal.

Flatten cardboard, do not crush recyclables: Crushing recyclables changes the shape and density, which is used to sort them properly. Do not crush your recyclables.

Control potential odors: Help reduce any potential odors from food waste by bagging trash that includes food scraps. Recyclables can be loose and placed directly into recycling container.

The Vero recycle bins are located in the G1 parking level against the wall near the Green Building Elevator and inside the Retail Garage near the vehicle exit. Please sort your recyclables and carry them down to either location. Boxes must be flattened to make room to accommodate all of the building recyclables. Please be considerate of your neighbors who park near the bins by not blocking their cars with your recyclables. If the G1 bins are full, please bring your items to the Retail garage. **Thank you for not throwing regular trash in these bins but using the trash chutes on each floor instead. Feel free to contact Management or the Front Desk with any questions. Thank you very much for your cooperation!**
