EV Charging Station Offer!

We have some very exciting news that we are now able to provide EV Charging to individual parking spaces at Vero! Due to LADWP rebates, EV charging stations are being offered for a **flat fee of \$700**. This is a tremendous savings as installing a personal charging station can range anywhere from \$2,500-\$5,000 depending on the location of the parking space.

We are currently taking orders and have a limited number available at the \$700 price so if you're interested, please contact management at marlafernandez@actionlife.com or 213-250-4232 by Friday, August 2nd to confirm.

Residential Garage WiFi

We are pleased to advised that we now have WiFi access in the residential garage for convenience with making calls or using GPS. Make sure your smartphone settings are enabled for WiFi calling and that you login to the Vero1234 network.

Network: Vero1234

Password: classicvero

This network is also enabled in the Main Lobby. If you need assistance with enabling this on your smartphone please feel free to stop by the Management Office or the Front Desk.
